Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Drawings

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because of overlapping lines and text in figures 4 and 5. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 and 16-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Flores (US 6,058,413).

Referring to claim 1. Flores discloses a method for automatically filing documents relating to business transactions, using a computer system, the method comprising:

- Producing at least one input data record from data relating to a business transaction, the input data record having a structure specific to a class of

business transactions and to one or more business applications (Flores: abstract, figures 4-6, and column 7, lines 44-61);

- Transforming the at least one input data record into an output data record designed for access by at least two business applications (Flores: figures 5-7);
- Storing the output data record with an identification code, wherein the output data record can be read in full or in part by the at least two business applications by referring to the identification code (Flores: column 9, lines 18-29).

Referring to claims 2-6. Claims 2-6 are rejected under the same rationale set forth above. Flores discloses a method of producing, transforming, transferring, and storing the records of claim 1 through the use of program modules via an interface (Flores: figures 3-4 and column 7, lines 4-20 and column 8, lines 14-30).

Referring to claim 7. Flores further discloses a method wherein the output data record is stored on a transactional basis (Flores: column 9, lines 18-29).

Referring to claim 8. Flores further discloses a method wherein the output data record includes, for a plurality of business applications, a database structure having one or more tables (Flores: table 2).

Referring to claim 9. Flores further discloses a method wherein the output data record includes, for different journals in accounting, different data areas (Flores: column 3, line 47 – column 4, line 11). The examiner notes that applicant's specification defines journals as tabular summaries of posting records, separated for example into areas regarding costs, storage type and location, and customer. Flores discloses separate database for recording sales price and quantity ordered (Flores: column 9, lines 44-58).

Art Unit: 3625

Referring to claims 10 and 16-24. Claims 10 and 16-24 are rejected under the same rationale set forth above. Flores discloses a system and medium according to claims 10 and 16-24 as evidenced by the cited portions in the rejection of the method claims and column 7, lines 4-20.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Abbruzzese (US 5,557,515) discloses a computerized system and method for managing transactions.
- Quinn (US 2005/0075964 A1) discloses an information management system for storing related documents regarding transactions.
